

Custom Aluminium Batten System Auckland University

Core Feature Wall Battens

System Overview

Clip On Batten System Overview

1. **Wall Mount Track**
Extruded mounting track screwed to framing or wall with suitable fixings.
2. **Wall Clip**
Manufactured from injection moulded engineering plastic assembled to track with ¼ Turn to clip into place. Optional locking set screw for added side to side security.
3. **Batten Clip**
Manufactured from injection moulded engineering plastic, clips into Batten extrusion and secured with a self tapping screw.
4. **Batten**
Aluminium extrusion batch powder coated to required colours.
5. **Batten Joiner**
Manufactured from injection moulded engineering plastic, pushed into batten ends to align adjacent battens where a join is required. Provides positive alignment and can be doubled up with a batten clip and screwed together through the extrusion to secure in place.

Clip On Batten System Wall Application

Able to be mounted over solid wall or framing with additional acoustic or insulation batts behind

Standard stud wall
600mm centres

600mm

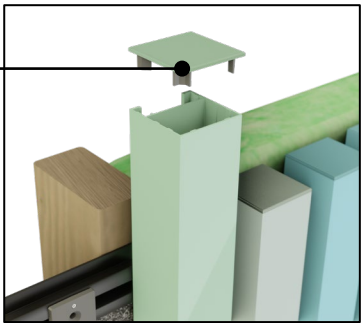

Mounting track

Mounting track
spaced as required
